WOOD FIRE GRILLS

MEMPHIS WOOD FIRE GRILLS

WOOD PELLETS

Memphis grills use natural wood pellets as fuel that enhances the taste of nearly everything you cook. From a mild smoked taste to hints of cherry, hickory, and pecan, there are flavors to suit any preference. Simply fill the hopper with pellets and set your temperature with the ITC control.

Memphis pellet grills create more heat while consuming less fuel, and provide consistent temperature control while allowing for less time hovering over the grill and more time gathering with friends and family.

ITC3 TOUCH CONTROL

The Intelligent Temperature Control automatically maintains your desired temperature. It measures temperature every two seconds and initiates the auger to automatically add pellets as needed.

INTELLIBURN TECHNOLOGY

Wood pellet fuel combusts and heats the cooking chamber. As the pellets burn, the blower introduces air at the top of the burn pot for increased efficiency. As air moves across the burn pot, hot air and smoke circulate throughout the cooking chamber.

MEMPHIS WOOD FIRE GRILLS

CONVENIENCE & CONTROL

The Memphis grills app allows you to track the internal temperature of your meats in real-time using up to three meat probes. Memphis Pro & Elite come with a convenient slot to run probes into the cooking chamber.

COOKING STYLES

Precision smoking, roasting, baking, and searing with more control than ever. Memphis combines the best parts of a convection oven, gas grill, and smoker to create amazing meals for your family and friends.

DIRECT FLAME MODE

Sear meat, fish, and vegetables with off-the-charts heat using direct flame mode. When using the Direct Flame insert on Direct Flame settings, the lid should always be in the open position. A closed lid can cause an Error-1 message. This means the grill reached too high of a temperature, and shut down to prevent damage. While operating the grill in Direct Flame Mode, the grill temperature will not be displayed on the ITC controller and the food probe will be in read only mode.

DIRECT FLAME INSERT

When the Direct Flame Insert is in place, only use Direct Flame Mode settings: LOW, MED, or EXTREME. Do not set the temperature between (180°F-700°F). Never use Direct Flame mode while the indirect insert is in place. Do not leave the grill unattended while using Direct Flame mode.

QUALITY

Durable and stylish stainless steel construction with all grills offered in freestanding or built-in configurations. Design and customize your dream outdoor kitchen with drawers and doors that are built to last.

PELLET GRILLS

ELEVATE 30" PELLET GRILL

BUILT-IN & FREESTANDING CONFIGURATIONS

CONFIGURATION 1

MG01-06-001

Memphis Elevate 30" Pellet Grill

MG11-06-001

Built-In Brackets (**REQUIRED**)

FEATURES

- 12 pound pellet hopper
- 180-600°F temperature range
- 578/1,079* square inch cooking surface (*optional grates)
- Convenient front tool bar
- Bluetooth/Wi-Fi app provides monitoring, alerts, timer, & control
- Convection cooking system
- Double walled, 430 stainless steel
- Indirect and direct flame modes
- Woven stainless steel lid gasket
- Comes with direct flame insert, genie tool, & one meat probe
- Requires MG11-06-001 brackets to complete built-in installation

CONFIGURATION 2

MG01-06-001

Memphis Elevate 30" Pellet Grill

MG11-06-002

Freestanding Leg Assembly

CONFIGURATION 3

MG01-06-001

Memphis Elevate 30" Pellet Grill

MG11-06-003

Surround Assembly

CONFIGURATION 4

MG01-06-001

Memphis Elevate 30" Pellet Grill

MG11-06-003

Surround Assembly

MG11-06-004

Cabinet Assembly

PRO 28" ITC3 BUILT-IN & FREESTANDING PELLET GRILL

FEATURES

- 18 pound dual hopper to blend pellet flavors
- 180-650°F temperature range
- 574/848* square inch cooking surface (*optional grates)
- 7" touch screen display
- 2 interior lights
- Bluetooth/Wi-Fi app provides monitoring, alerts, and a timer, control functionality not available

VGB0001S
Memphis Pro 28" ITC3
Built-In Pellet Grill

VG0001S
Memphis Pro 28" ITC3
Freestanding Pellet Grill

- DC motor & blower with variable speeds
- Secondary combustion for fuel efficiency
- Clean start ignition
- Double walled, 304/430 stainless steel
- Indirect and direct flame modes
- Woven stainless steel lid gasket
- Pre-programmed grill cleaning routine
- Comes with direct flame insert, genie tool, & one meat probe

ELITE 39" ITC3 BUILT-IN & FREESTANDING PELLET GRILL

FEATURES

- 24 pound dual hopper to blend pellet flavors
- 180-700°F temperature range
- 862/1,275* square inch cooking surface (*optional grates)
- 7" touch screen display
- 2 interior lights
- Bluetooth/Wi-Fi app provides monitoring, alerts, and a timer, control functionality not available

VG0002S

Memphis Elite 39" ITC3
Built-In Pellet Grill

VG0002S

Memphis Elite 39" ITC3
Freestanding Pellet Grill

- DC motor & blower with variable speeds
- Secondary combustion for fuel efficiency
- Clean start ignition
- Double walled, 304/430 stainless steel
- Indirect and direct flame modes
- Woven stainless steel lid gasket
- Pre-programmed grill cleaning routine
- Comes with direct flame insert, genie tool, & one meat probe
